SYNOPSIS

TOMORROW'S POWER: HOPE IN TIMES OF CRISIS follows stories of communities and movements intensely challenging current power structures, leading to possibilities of a future with both social and climate justice. The film takes YOU AROUND THE WORLD FROM war torn, oil-rich Colombia where people have been building a peace process from the bottom up to Germany, where activists are pushing the country to fully leave behind the extraction of fossil fuels and complete it's transition to renewable energy. And finally, the story of EmpowerGAZA, in Gaza City where the problem of daily energy blackouts, borne out of the 11-year siege is being tackled by health practitioners through solar power in order to provide essential care in hospitals.

Amy Miller is an award winning media maker and social justice organizer based in Montréal. Her documentaries include No Land No Food No Life a hard-hitting film on the economy, agricultural-land grabs and the changes to farmers' lives around the world and The Carbon Rush, a global exposé on how carbon offset projects impact local peoples. This film has expanded to include an online interactive game as well as a photo-essay book published by Red Deer Press (2014).

Byron A. Martin is an award-winning producer that develops independent film, television and documentary projects. To date he has produced almost 100 hours of television, filming projects in fifteen countries. He has produced projects for Disney, Sony, Universal, Turner and managed productions for some of Hollywood's leading producers.
